ASRF - ____ - _S Series

Specifications -

Servo Roll Feeder Heavy series (HS)					
Model	Max width in mm	Thick ness Range in MM		Max thickness with max width	Max Velocity in MPM
		Mini	Max		
ASRF-200-HS	200	1	6	6	40
ASRF-300-HS	300			6	40
ASRF-400-HS	400			5	40
ASRF-500-HS	500			4.8	40
ASRF-600-HS	600			4.5	40
ASRF-800-HS	800			3	40
ASRF-1000-HS	1000			2	40

Servo Roll Feeder Medium series (MS)					
Model	Max width in mm	Thick ness Range in MM		Max thickness with max width	Max Velocity in MPM
		Mini	Max		
ASRF-200-MS	200	0.3	3.5	3.5	40
ASRF-300-MS	300			3	40
ASRF-400-MS	400			2.5	40
ASRF-500-MS	500			2	40
ASRF-600-MS	600	0.3	2.5	2.5	40
ASRF-800-MS	800			1.6	40
ASRF-1000-MS	1000			1.5	40

ASRF Series

Introduction-

- Out of available two variants in same series ASRF, MS series is used for lower thickness range sheet feeding which lies between 0.3 – 3.5 mm.
- MS Series is the economical variant developed to automate the sheet feeding operation where Sheet coils can not be directly used and sheared Sheets are the only option.
- HS Series is the Heavy duty variant for thicker sheet feeding till 6mm Thickness.
- Also, Servo Roll Feeder comes with Two Stationed system based on application to synchronize with each other to form a unified arrangement such that sheet remains in contact with any one station always throughout operation cycle.
- Press synchronization along with Feeder is must to make sure operation stays smooth and uninterrupted for efficient results.
